

Two Stages Model Training

Stage 1: Supervised Temporal Instruction Tuning

Supervised Temporal Instruction Tuning

Role: You are a time series forecasting expert.
Meta: <Variable Specify>
Instruction: <task description>
History Statistics:
HUFL: 8.305999755859375, 8.77400016784668, 9.3100004196167...
HULL: 5.0900001525878915, 5.357999801635742, 4.622000217437744...
...

Stage 2: Reinforcement-Driven Forecasting Refinement

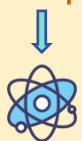

Fine-tuned LLM

Dual-Stream Sample Mining

G Groups

Reference Model

Reward System

Group Computation

Final Policy LLM

Syntactic Correction

Semantic Reinforcement

REWARD SYSTEM

Sequence Length Consistency

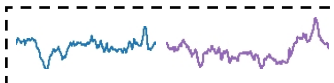

Format Compliance

Prediction Accuracy

Inference

Semantic Concatenating

Policy Model
